

DC Scientific

Petroleum Testing Equipment

ISO 9001:2008 Certified

DC Scientific is an ISO 9001:2008 registered manufacturer of precision glassware products, testing equipment, and accessories for the petroleum laboratory. DC manufactures products ranging from viscometer tubes to FIA Systems to temperature probes for leading brands of equipment. DC is also partnered with AD Systems, B/R Instrument, HORIBA Scientific, Paragon Scientific, Tamson and Lovibond Tintometer to provide world class products for petroleum testing. AD Systems provides Jet Fuel and Lubricants Testing Equipment, B/R Instrument provides D1160 Vacuum Distillation Systems. Paragon Scientific, a dual ISO 17025 and ISO Guide 34 accredited company, provides Certified Reference Materials for a variety of test methods. Tintometer, an ISO 9001 registered manufacturer, products include Color Measurement Equipment including ASTM, Saybolt, APHA/Pt-Co/Hazen Color and more. Tamson products include Viscosity Baths, Heating and Cooling Baths and Circulators. DC Scientific also provides service for most major brands of petroleum testing equipment and is a Tintometer, Tamson, and HORIBA Certified Service Center.

Our Products and Services

ASTM Petroleum Laboratory Glassware

- Viscometers
- Distillation
- Cloud Point
- Pour Point
- FIA Columns and Systems
- Ramsbottom
- Oxidation
- Foaming
- Thermometers and Hydrometers
- Glass PT100 Probes

The largest stock of
ASTM glassware available!

Custom Glassware

- Distillation
- Combustion Tubes
- Environmental
- Research and Development
- Borosilicate and Quartz Repairs

DC Scientific can fabricate all custom or OEM glassware. OEM products and our standard glassware can also be private labeled. Please provide computer drawing or detailed sketch that includes all dimensions, tolerances and quantity. We are always able to assist you in designing custom borosilicate or quartz glassware. Please contact us if you have any questions.

Measurement and Calibration Standards

- General Viscosity
- Low Temperature Viscosity
- Silicone for Rotational Viscosity
- Cold Crank Simulator
- Flash Point (non-hazardous)
- Color
- Total Acid (TAN) and Base (TBN) Number
- Refractive Index
- Conductivity
- NEW! Synthetic Sea Water
- NEW! Lithium Chloride

Instrumentation

- NEW! Heater Tube Deposit Rater for Jet Fuel (JFTOT® Procedure)
- NEW! Automated Smoke Point for Jet Fuel
- NEW! Dispensancy Tester for Lubricants
- Viscosity Baths
- Digital Thermometers
- Heating and Cooling Baths and Circulators
- Color Measurement for ASTM, Saybolt and APHA/Pt-Co/Hazen
- Vacuum Distillation
- Salt-in-Crude Analyzer

Service

- Lovibond Tintometer, HORIBA Scientific and Tamson Certified Service Center
- Instrument Calibration and Repair
- Preventive Maintenance Contracts
- Equipment Training
- Thermometer and Hydrometer Calibration
